EDUCATION

Amador Valley High School

GPA: 3.8/4.0

Sophomore

2024 – 2028 (Expected Graduation)

- **Courses:** AP Computer Science A, CTE Computer Science Pathway, Cybersecurity (Enrolled for 2026-2027), AP World History, Honors Pre-Calculus, Chemistry, Physics, Honors English
- Achieved a perfect score in the first semester of AP Computer Science A

EXPERIENCE

ACE Coding Club

Harvest Park Middle School

Python Instructor | Python

January 2025 – Present

- Instructed a class of **15+** middle school students in fundamental Python programming, resulting in a **100%** project completion rate for the introductory curriculum
- Developed and optimized **10+** hands-on lesson plans focusing on variables, loops, and beginner algorithms, accelerating student comprehension and engagement
- Mentored students through complex debugging sessions, improving their computational thinking and reducing average code-resolution time during lab exercises

LEADERSHIP

AVHS Swim Team

Pleasanton, CA

Team Captain and Varsity

February 2025 – Present

- Managed and motivated a roster of **20+** varsity athletes, collaborating with coaching staff to execute weekly training programs and improve overall team performance metrics
- Acted as the primary liaison between athletes and coaches, leveraging strong communication skills to align team goals and maintain high morale
- Fostered a culture of accountability by mentoring underclassmen on goal-setting and technique, contributing to a consistently high-performing team dynamic

HONORS & AWARDS

USACO Silver Division | C++

2026

- Qualified for the USACO Silver division by achieving a top-tier score of **972/1000** in the First Bronze Contest
- Demonstrated advanced proficiency in **graph algorithms**, **greedy methods**, and **binary search** through high-pressure competitive programming

Competitive Programming | Python, Java, C++

Ongoing

- Solved **100+** complex LeetCode problems focusing on arrays, dynamic programming, and trees
- Cultivated the rigorous algorithmic problem-solving and critical thinking skills required for technical incident response and cybersecurity threat analysis

SKILLS

Languages: Python, Java, C++

Tools & Concepts: Git, GitHub, VS Code, Linux, Data Structures & Algorithms, Object-Oriented Programming

Interests: Cybersecurity, Network Security, Ethical Hacking, Chess, Competitive Swimming, Competitive Coding, Algorithm Problem Solving
